NOTES ON PDF PATTERN DOWNLOADS

The easiest way to get PDF's printed is to send them to a printer that can print A0 size. Here are some online suppliers where you simply upload the pdf file you've purchased:

<https://clcpriints.com/products/a0-a1-pattern-printing-per-sheet>

Or <https://flamingoprints.co.uk/product/pattern-printing/>

This saves printing and sticking loads of A4 sheets together which can be tricky to do accurately.
